AIR FREIGHT

SERVICE OVERVIEW

- Import and export services
- Comprehensive door-to-door live tracking of consignments
- 24/7 warehouse operations
- Global point to point air freight consolidation services
- Solution options that include daily and weekly express services
- Flexibility over delivery choices (e.g. door-to-door, airport-to-airport)
- Combined air and ocean services to reduce transit times while remaining cost effective
- Transition your products directly into our inventory management and last mile delivery services

GLOBAL NETWORK

Our comprehensive global network avoids third party involvement and ensures a local contact at each point of the supply chain. Our branch network objective is to reduce the time your team spends on managing freight movements.

GLOBAL VISIBILITY

A single technology platform links all our global branches' systems and procedures. Your team can operate efficiently by working with real time data accessible anywhere in the world.

PHARMACEUTICALS

Distribution of pharmaceuticals and pharma related products is not simple and requires a high level of knowledge and process quality. With our GDP certified air & ocean branches, we can support the medical and pharmaceutical industry with their supply chain needs to and from any location, globally.

CUSTOMS EXPERTISE

Our experienced teams will manage customs, quarantine and duty changes to reduce compliance risks and costs.

OCEAN FREIGHT

SERVICE OVERVIEW

- Import and export services
- Full container loads (FCL)
- Less than container load (LCL) consolidation services point to point globally
- Combined air and sea services to reduce transit times while remaining cost effective
- Specialised teams;
 - Project logistics
 - Seeds & grains
 - Bulk liquids & tanks

LCL CONSOLIDATION

Less than container load (LCL) shipments are consolidated and managed within our network. This allows us to control costs, avoid third party involvement and reduce ground handling risks.

Utilising our LCL services enables you to send more frequently, in varying quantities, allowing you to meet the fluctuating demands of your customers/market.

GROUND NETWORK CONTROL

Our global network allows you to minimise the risk of handling damage and improve supply chain efficiency by transitioning your import or export products directly into our own inventory management and last mile delivery services.

CUSTOMS EXPERTISE

Our experienced teams will manage customs, quarantine and duty changes to reduce compliance risks and costs.

WAREHOUSING

SERVICE OVERVIEW

- Inventory storage and management
- EDI / API integration
- RF and voice picking
- Promotional packaging
- Product recall services
- eCommerce logistics
- Bonded warehousing
- Satellite racking
- Vertical Lift Modules
- Hazardous facilities
- Food grade management
- Temperature control
- Scanpacking to meet all retailer labelling requirements
- Co-packing and Value Added Services
- TGA compliance

GLOBAL INVENTORY VISIBILITY

One Mainfreight warehousing management platform allows your team to work efficiently in one system across any combination of cities and country warehouse locations.

TRANSPORT CONNECTION

Our warehouses are located in close proximity to our transport depots to maximise supply chain efficiencies and minimise handling.

REDUCING COSTS

Our variable costing model accommodates seasonal inventory fluctuations without committing your business to fixed warehousing costs.

CUSTOMISED SOLUTIONS

Our analysts generate a variety of scenarios to support you in creating the most cost effective supply chain and technology solution for your business.

SINGLE POINT OF CONTACT

One single pro-active point of contact who understands your business for all your European shipments.

DISTRIBUTION NETWORK

Your products are controlled through our comprehensive European partner network ensuring high efficiency in deliveries to any country in Europe. Mainfreight connects economic centres to each other with daily linehails. The short last mile is taken care of by knowledgeable local partners that understand your customers. EDI interfaces between Mainfreight and delivery partners allow for seamless visibility.

SPECIAL SERVICES

Mainfreight Special Services delivers shipments where deliveries from A to B are not sufficient. While you focus on your core business, we take care of your transport.

- White Glove deliveries
- Event deliveries
- High Value deliveries

CUSTOMER SERVICE

Our decentralised customer service teams are located in each branch, making decisions as close to customers as possible. This provides timely, accurate information on shipment status, reducing the time your team may spend on the phone chasing down responses.

DIRECT LOADS (LTL & FTL)

When you have a sizable load of products or equipment to move, our European direct delivery service is the way to go. The truck that picks up your freight will deliver it direct to the customer. This means no crossdock handling of your products, reducing the risk of damage and lowering overall costs.

RETAIL CONTROL TOWER

Your shipments to retailers such as Amazon, Coolblue and Zalando will be carried out in this control tower. We will take care of your shipment bookings via various retail portals and ensure strict delivery deadlines are met throughout Europe.

TECHNOLOGY

CUSTOMISED TECHNOLOGY

Owning and developing all our technology systems means we have the flexibility to make software changes as our customers' needs and requirements change.

LOCAL IT TEAM

Our dedicated technology team are based in Australia and New Zealand, providing timely information to our team and customers as needed.

TAILORED SOLUTIONS

Our analysts review your business data and generate a variety of "what if" supply chain scenarios.

EDI/API INTEGRATION

Directly link your systems to ours for total visibility and control within your own business environment, saving your team time and improving accuracy.

CYBER SECURITY

We have a dedicated cyber security team who are responsible for the development of our cyber security strategy.

- Behaviour and awareness
- Incident management
- Vulnerability management
- Host security
- Network security

Through Mainchain we are able to provide our customers with global visibility of their entire supply chain across all regions and divisions within our business.

Key features:

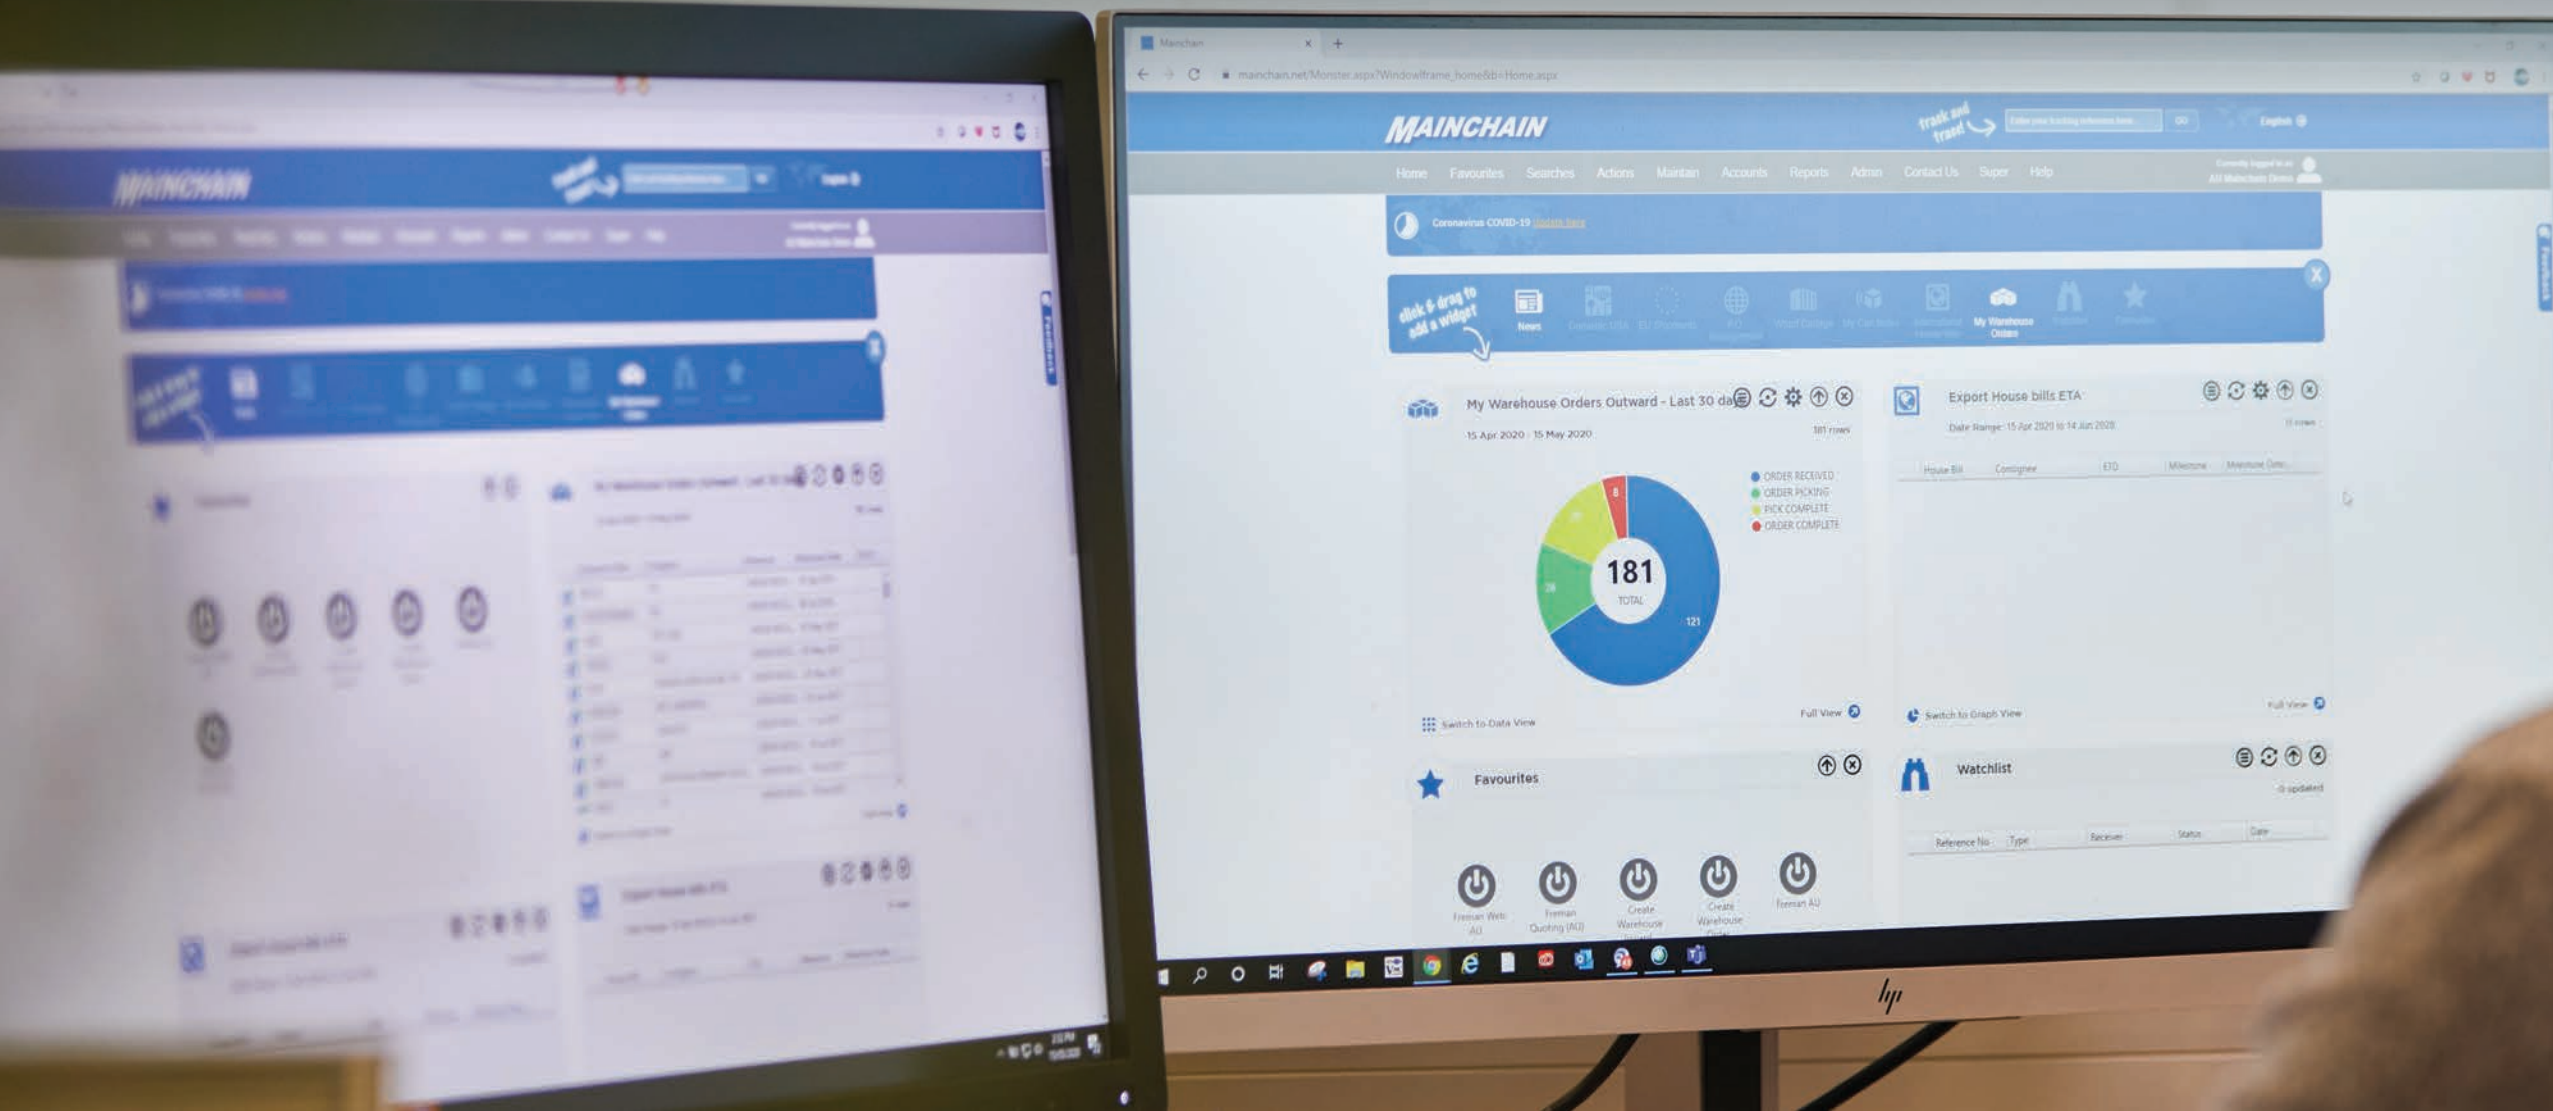

- Access real time data
- Set up notifications
- Reporting & analytics dashboard
- Store documents
- Stay on the go with our mobile app
- Emissions tracking

Scan the QR code to view our detailed technology brochure to understand more about the value our technology can bring to your business.

Key benefits:

- Enable supply chain visibility
- Create efficiencies in your supply chain
- Reduce time & resources needed to analyse your supply chain performance
- Optimise warehouse performance
- Plan labour management
- Reduce supply chain costs
- Understand & report on your sustainability impact

OUR COMMITMENTS

CUSTOMER DEVELOPMENT

Promoting from within ensures we are able to develop and train account managers with real operational and analysis skills that can work closely with you to identify service improvement opportunities.

CONTINUOUS IMPROVEMENT

Our team provide on-going analytical and operational support focusing on streamlining service levels and driving cost reductions across your supply chain functions. Utilising a range of reporting tools, areas for improvement are highlighted and corrective actions and measurements are put in place.

TEAM DEVELOPMENT

We are committed to ensuring our team members have the skills they need to meet both our customers' expectations and to contribute to the ongoing development of our business. At our dedicated in-house training centre, our teams gain deep operational knowledge in order to offer real solutions and operational value to our customers.

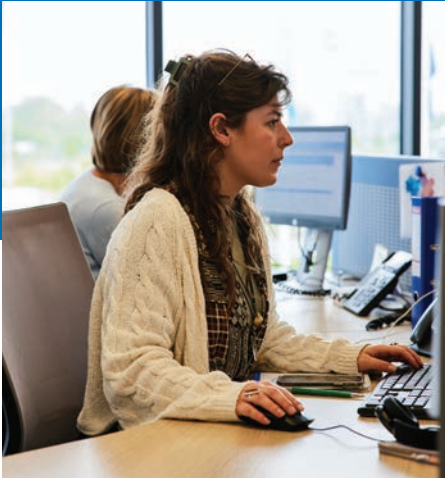

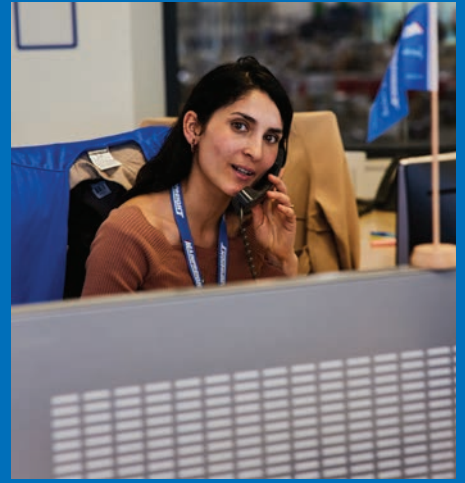

Our people strategy is simple: hire the right people, promote from within and always have the ability to grow with a talented passionate and intelligent team.

SUSTAINABILITY

As a progressive global business, we are mindful of our responsibilities to the communities we live and operate in around the world. Environmental and sustainability initiatives are a key part of the planning and development of new facilities and processes as we expand. We actively seek ways to leave the lightest possible imprint on the planet.
