The maximum weight allowed for a non- stackable pallet for collection/delivery with tail-lift is 1.000 kg. The maximum height is 2.20 m.
- 5.2 Our lead times are indicative. No rights can be derived. During periods of limited capacity (for example bridge days, summer and Christmas holidays), lead times cannot be guaranteed. This limited capacity (e.g. for destinations in Spain and Italy) can also have an impact on the cost price.
- 5.3 Time allowances for loading and unloading are as follows:
- Consignments of less than 2.500 kg taxable weight (1 until 4 standard pallets): max. 15 min per address
 - Consignments of more than 2.500 kg taxable weight (until full loads): max. 1 hour per address

Individual packing units (boxes) may be a maximum of 30 kg each. Boxes above 30 kg in weight must be supplied on pallets regardless of quantity. A maximum of 5 separate boxes may be presented for shipment; consignments of 6 boxes or more must be supplied on pallets. Any packing lists used must be affixed to the consignment.
- 5.6 The client is responsible for the accuracy of the data transferred. Mainfreight cannot be held responsible for the consequences arising from incorrect or incomplete information.
- 5.7 The sender must hang additional documents (such as packing notes, excise documents) to the goods. Mainfreight is not responsible for the result of fines due to the lack of certain documents or the incompleteness.
- 5.8 If a consignment cannot be received at the first delivery attempt, the second delivery will also be charged, for Benelux 100 % and for international transports 70 % over the full price, unless agreed otherwise in writing. Should the non- executed delivery be the result of a failure on the part of Mainfreight, no fee will be charged for the second delivery.
- 5.9 If the freight payer does not have a VAT code number, Mainfreight is authorised to claim payment immediately when the assignment is issued.

Article 6 Rate calculation Method

The rates are based on a kg sliding scale per shipment and are calculated in Euros (€).

6.1 Paying weight

The paying weight determines the weight sliding scale applicable to the quote. The paying weight can be determined by taking the higher of:

- the actual gross weight
- the volume weight, which can be determined based on the following premises:

6.2 Calculation

Our rates are calculated on the following basis:

- $1 \text{ m}^3 (\text{coli}) = 330 \text{ kg}$ $\text{m}^3 = \text{Length} \times \text{Width} \times \text{Height}$
- $1 \text{ loading meter} = 1.750 \text{ kg}$ $\text{loading meter} = (\text{Length} \times \text{Width}) / 2,4$

Boxes (coli) – packing units:

Coli	Max weight 30 kg per unit Max 5 separate units accepted (see also Article 7 Surcharges)	Calculation: m^3 $\text{Length} \times \text{Width} \times \text{Height} \times 330 \text{ kg}$
Coli (>30 kg per unit)		Calculation: see loading meters (pallets)

Pallets:

Pallets	Max weight 1.000 kg (excluding IBC) Max height van 2.20 m; from 5 pallets the max height is 2.40 m.	Calculation: $\text{loading meter} (l \times w) / 2,4 \times 1.750 \text{ kg}$ <i>Remark: from 2,10 m pallet height the calculated volume weight based on m^3 can be higher than based on loading meters.</i>
---------	--	--

Bundles/Crates/Pallets:

Length < 240 cm	Max weight 30 kg	Calculation see Boxes
	Weight > 30 kg	Calculation see Pallets
Between 240 cm and 400 cm*	Max weight 30 kg	Calculation based upon Boxes + 50 %
	Weight > 30 kg	Calculation based upon Pallets + 50 %
Between 401 cm and 600 cm*	Max weight 30 kg	Calculation based upon Boxes + 100 %
	Weight > 30 kg	Calculation based upon Pallets + 100 %
> 600 cm*	Max weight 30 kg	Calculation based upon Boxes + 150 %
	Weight > 30 kg	Calculation based upon Pallets + 150 %

* The length surcharge is always calculated and invoiced over the entire shipment (and not just on the length itself).

* Lengths more than 240 cm are not possible with a loading or unloading ramp.

Article 8 ADR

When presenting hazardous materials, the customer has to ensure that the goods are in compliance with ADR rule

1.4.2.1.1 and the applicable national legislation. The customer is responsible for appropriate labelling, approved packaging, transport documents and the Dangerous Goods Declaration (multi-modal transport). If the shipment contains hazardous substances, the UN-number, substance name, label numbers and packing group must be announced to Mainfreight when confirming the order at the latest. This also applies for dangerous goods sent as "Limited Quantities". In case of incorrect entry or the wrong forwarding of ADR goods, we are obliged to pass on the resulting costs.

The transport of ADR goods that fall within classes 1, 6.2 and 7 is prohibited. The transport of class 5.2 goods is prohibited in The Netherlands. There are countries to which we are not able to deliver class 6.1 goods. In addition, a number of goods with high hazard potential, this can be found in annex 1.

Article 9 Terms of delivery

Mainfreight operates in accordance with the Incoterms of the international Chamber of Commerce (Incoterms 2020). These terms of delivery can be downloaded from our website <https://www.mainfreight.com/belgium/en-nz/info-point>.

Article 10 Transporters liability (national/international)

Whenever Mainfreight conducts international or national transport assignments, the CMR convention applies. These provide for a limitation of liability, which may limit the transporters' liability to less than the total value of the consignment. For full coverage of the actual value of the goods during transport, the client is strongly advised to insure goods against the risks of transport. A transport insurance (goods) policy offers several advantages: full compensation based on the value of your goods, no problems with the limited liability of the carrier, compensation in case of force majeure of the carrier etc. Damages excluded from cover are, for example, damage due to own intent or defects and damage caused by inherent vice or natural deterioration of a good. According to CMR conditions, your shipment is insured for the transportation price or possibly for the weight of the shipment. A transport insurance (goods) policy insures the total value of the shipment. Beware that you first must pay the transport invoice in the event of a claim – in accordance with the applicable CMR convention – if we agree to the claim, we will reimburse you pro rata. For any related questions regarding damage, please send an email to our claim services: gnk.claims@mainfreight.com (Genk) or zwi.claims-mft@mainfreight.com (Zwijnaarde)

Article 11 Reporting obligation for valuable consignments

The client warrants that the value of the consignment to be transported does not exceed € 50,000. Mainfreight accepts the assignment explicitly under this condition. If the value of the consignment to be transported is more than € 50,000, Mainfreight must be notified of the value in writing in advance of the transport. At the explicit request of the client, Mainfreight will attempt to contract supplemental insurance for the transport at the client's expense.

Article 12 Alcohol transport and excise administration

Alcohol transports must always be accompanied by the necessary documents that must be correctly formatted. Mainfreight can never be held responsible for the incorrect layout of documents. In the absence of this, € 15,00 will be charged for the request.

In accordance with Commission Regulation (EC) No 684/2009 of 24 July 2009, field 15 must be completed with the name and address of the first carrier. If it turns out that field 15 has not been filled in correctly, a violation must be retained. This violation is punished based on Article 47 of the Act of 22 December 2009 on the general regulation on excise duties, which foresees a fine of EUR 625 up to EUR 3,125.

It should also be noted that, in accordance with Article 21 §6 of the "Council Directive 2008/118 / EC of 16 December 2008 concerning a general scheme for excise duty and repealing Directive 92/12 / EEC" when sending excise goods under the suspension arrangement the goods must be accompanied by a printed copy of the electronic administrative document or any other commercial document clearly stating the unique administrative reference code (ARC). This document must be available to the administration at any request throughout the duration of the transfer.

If you do not have your own excise number, please contact us for more information about the preparation of the necessary excise documents and further settlement.

Alcohol shipments IT-BE, BE-IT with an alcohol percentage between 15% and 40% are subject to a surcharge of €150 per shipment. Shipments with an alcohol percentage above 40% will be refused.

Article 13 EURO-pallet exchange

EURO-pallet exchange is the process whereby the sender of goods and the receiver of goods exchange EURO-pallets. The sender must clearly indicate on the transport order that the goods are placed on EURO-pallets. The receiver of the goods returns (exchanges) empty EURO-pallets to the sender. As a supplier of transport solutions Mainfreight has the capacity to facilitate the exchange process. EURO-pallet exchange is, subject to prior agreement between both parties (you and Mainfreight), a standardized process in the Benelux and Germany, and applies exclusively to export shipments and only within the groupage-network; direct shipments are not included. Mainfreight does not exchange EURO-pallets for deliveries to other countries.

The actual exchange, whereby the receiver returns the same quantity of EURO pallets to Mainfreight as it has received one-to-one, takes place when the shipment is delivered. All EURO-pallets that cannot be exchanged one-to-one on delivery by the receiver are regarded as not exchanged. The obligation to exchange pallets then lapses. Mainfreight will not be obliged to return these non-exchanged EURO-pallets to the sender.

There is a surcharge for EURO-pallet exchange of € 2,50 per sent EURO-pallet. Although EURO-pallets are produced in a sustainable manner, they can nevertheless only be used a limited number of times within the normal quality standards. This is why Mainfreight uses a write-off percentage of 15%, which means that for every 100 exchanged EURO pallets, 15 pallets are not returned to the sender.

Mainfreight will draw up a balance sheet of EURO-pallets between Mainfreight and the sender. This balance sheet is then given to the sender as notification. After this balance is agreed, negotiation takes place on whether transactions must be planned in order to maintain the balance. This means that Mainfreight can send empty pallets to the receiver or collect them if Mainfreight is in credit with the receiver. The pallet balance can be settled to one year in the past. Mainfreight does not charge any fee for the maintenance of the administration of all EURO-pallet transactions and for drawing up the EURO-pallet balance sheets.

For import and LTL-FTL freights, we do not use a EURO pallet exchange process.

Article 15 Incoterms

In an international transaction, buyer and seller usually agree on an ICC Incoterms® 2010 or 2020 rule. This determines the rights and obligations of both parties regarding transport, insurance, permits and customs formalities. Shipments with the following incoterms can be handled by Mainfreight:

- DAP (Delivered at Place) plus reference of the agreed place of unloading (=delivery address)
- DDP (Delivered Duty Paid) plus reference of the agreed place of unloading (=delivery address)
